

LU I A I R

Rigid frame and even pleat alignment for maximum capture of air impurities and longer hours of operation

24 x 24 x 2 pre-filter.
Assembled using two mating pieces of die cut board with artistically designed diagonal support assembly.
Tested and rated under strict supervision to be fully resistant in racking and warping during heavy operation

STRICT QUALITY CONTROL

Captures More Dirt

Strict quality control produces even pleat shape, count, height and spacing for optimum performance.

Reliable Filter

The die cut frame is fully applied with quality adhesive to ensure strong bonds, and the media pack tips are carefully bonded to support assembly to prevent pleat misalignment during operation.

AFFORDABLE COST

Locally Made, Meeting Global Standards

Being one of the pioneers in the locally produced filter market, our goal is meeting global standards in our products while offering at absolutely low costs.

FLEXIBLE SIZES

We are committed to provide for your filter needs. That's why we increase our flexibility in terms of filter sizes. You can order any sizes of your need. You ask it, and then we have it. Ask our representative now!
